## Badge Visual Design

## Publishing

Issuer submits new badge in 'Final Draft'

Badge data is Quality Assured by our team

The team will be in touch if a badge needs work. Issues resolved

Badge visual designed using your logo (supplied when you sign the membership agreement)

Badge added to Credly ready to be issued.

# Quality Assurance: What do we check?

## Spelling & Conventions

We will check for any typos or sentence structures that don't fit with our usual conventions, or where criteria would be better understood if split down.

### Actions:

We will amend typos and easily corrected deviation from our badge writing conventions.

## Skills Tags

We check that skills tags are properly evidenced in your earning criteria.

We may remove duplicates, similarly named tags that cover the same skill, or skills that aren't referenced in earning criteria.

## 'The Stranger Test'

We check that titles, descriptions, and earning criteria are easily understood by a stranger e.g. a future employer.

We may get in touch for additional information or clarification.

## The Badge Standard

We will check that the criteria you've supplied properly aligns with the layer of the standard that you have selected.

We may get in touch if we believe your badge might be better suited to a different layer of the Badge Standard.
